I was very shocked and worried to hear about the processes going on in any non-free range chicken and hen factory farming.

Although I deeply oppose exploiting animals in any form, I also like any person do not wish to sacrifice my health for an egg. The process of forced molting is terrible for the good health of these animals. ~~Research~~ Research shows that forced molting is a major cause of salmonella poisoning in eggs. The stressful conditions weaken the birds immune systems so badly that they become prone to disease, bone breakage and salmonella infections. The result is sick birds and contamination.

I also became aware that male ~~chicks~~ chicks are suffocated and crushed to death. Why?

Please look into these problems as I cannot risk my health any longer as I have suffered cramps in my intestines and
